AMLAKIE ABEBAW

Project Manager
Frontend Developer
Backend Developer

PROFILE

I am a self-motivated and proactive fourth-year Software Engineering undergraduate passionate about technology and continuous learning. I thrive in dynamic environments and am eager to contribute to a professional organization. My expertise lies in front-end development, with a strong focus on Java and HTML. Additionally, I actively explore cutting-edge fields like artificial intelligence and data science. Through hands-on projects and collaboration, I continuously seek new challenges to enhance my skills and drive personal growth.

PREVIOUS WORKS

HIMS

20XX-PRESENT

I developed a Hospital Information Management System (HIMS) to streamline patient management and hospital workflows. The system integrates HTML, JavaScript, PHP, and databases for efficient record handling.It ensures secure authentication, data accessibility, and scalability.This project strengthened my skills in system architecture and healthcare IT solutions.

Senior Website Developer

20XX-20XX

Actively participated in the development and evolution of brand identities, was involved in various stages of project lifecycles, and contributed to projects that received awards.

Gibi Gubye Management System

20XX-20XX

I contributed to the development of the Gibi Gubaye Management System as part of a team project. We collaborated to design and implement a system for efficient management and workflow automation. My role involved working on frontend, backend, and database integration to enhance functionality. This experience strengthened my skills in team collaboration, system architecture, and problem-solving
